Notes to Consolidated Financial Statements

THE 77 BANK, LTD. AND CONSOLIDATED SUBSIDIARIES
Year Ended March 31, 2018

1. BASIS OF PRESENTING CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Act and its related accounting regulations and the Enforcement Regulation for the Banking Law of Japan (the "Banking Law"), and in accordance with accounting principles generally accepted in Japan, which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards.

In preparing these consolidated financial statements, certain reclassifications and rearrangements have been made to the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan. In addition, certain reclassifications have been made to the 2017 consolidated financial statements to conform to the classifications used in 2018.

In accordance with the Japanese Financial Instruments and Exchange Act and other relevant regulations, all Japanese yen figures in the consolidated financial statements have been rounded down to the nearest million yen, except for per share data. Accordingly, the total of each account may not be equal to the combined total of individual items. Also, U.S. dollar amounts have been rounded down to the nearest thousand dollars.

The consolidated financial statements are stated in Japanese yen, the currency of the country in which The 77 Bank, Ltd. (the "Bank") is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥106.24 to U.S.$1, the approximate rate of exchange as of March 31, 2018. Such translations should not be construed as representations that the Japanese yen amounts could be converted into U.S. dollars at that or any other rate.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Consolidation—The consolidated financial statements include the accounts of the Bank and its significant subsidiaries (collectively, the "Companies"). There were seven (seven in 2017) consolidated subsidiaries as of March 31, 2018.

Under the control and influence concepts, those companies in which the Bank, directly or indirectly, is able to exercise control over operations are fully consolidated.

All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profits included in assets resulting from transactions within the Companies are eliminated in consolidation.

(1) Scope of consolidation

Consolidated Subsidiaries

77 Business Services Co., Ltd. and 77 Jimu Daiko Co., Ltd. were dissolved on March 31, 2018, and currently in the process of liquidation.

Unconsolidated Subsidiaries

77 Capital Co., Ltd.

77 New Business Investment Limited Partnership

Unconsolidated subsidiaries are excluded from the scope of consolidation because such exclusion has no material impact on the consolidated financial statements in terms of total assets, income, net income (corresponding to the Bank's share), retained earnings (corresponding to the Bank's share) and accumulated other comprehensive income (corresponding to the Bank's share).

(2) Equity method

Unconsolidated Subsidiaries Not Accounted for by the Equity Method

77 Capital Co., Ltd.

77 New Business Investment Limited Partnership

These companies are excluded from the scope of equity method accounting because such exclusion has no material impact on the consolidated financial statements in terms of net income (corresponding to the Bank's share), retained earnings (corresponding to the Bank's share) and accumulated other comprehensive income (corresponding to the Bank's share).

b. Business Combinations—Business combinations are accounted for using the purchase method. Acquisition-related costs, such as advisory fees or professional fees, are accounted for as expenses in the periods in which the costs are incurred. If the initial accounting for a business combination is incomplete by the end of the reporting period in which the business combination occurs, an acquirer shall report in its financial statements provisional amounts for the items for which the accounting is incomplete. During the measurement period, which shall not exceed one year from the acquisition, the acquirer shall retrospectively adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and that would have affected the measurement of the amounts recognized as of that date. Such adjustments shall be recognized as if the accounting for the business combination had been completed at the acquisition date. A parent's ownership interest in a subsidiary might change if the parent purchases or sells ownership interests in its subsidiary. The carrying amount of noncontrolling interest is adjusted to reflect the change in the parent's ownership interest in its subsidiary while the parent retains its controlling interest in its subsidiary. Any difference between the fair value of the consideration received or paid and the amount by which the noncontrolling interest is adjusted is accounted for as capital surplus as long as the parent retains control over its subsidiary.

c. Cash and Cash Equivalents—For the purpose of the consolidated statement of cash flows, cash and cash equivalents represent cash and amounts due from the Bank of Japan.

d. Trading Account Securities, Investment Securities and Money Held in Trust—Securities other than investments in affiliates are classified into three categories, based principally on the Companies' intent, as follows: (1) trading account securities, which are held for the purpose of earning capital gains in the near term, are reported at fair value and the related unrealized gains and losses are included in earnings; (2) held-to-maturity debt securities, which are expected to be held to maturity with the positive intent and ability to hold to maturity, are reported at amortized cost; and (3) available-for-sale securities, which are not classified as either of the aforementioned securities, are reported at fair value with unrealized gains and losses, net of applicable taxes, reported in a separate component of equity.

The cost of trading account securities and available-for-sale securities sold is determined based on the moving-average method.

In addition, investments in unconsolidated subsidiaries not accounted for by the equity method are reported at cost determined by the moving-average method.

Available-for-sale securities for which fair value is extremely difficult to determine are reported at cost determined by the moving-average method.

For other-than-temporary declines in fair value, investment securities are reduced to net realizable value by a charge to income.

Securities included in money held in trust are also classified and accounted for using the same method as above.

The components of trust assets are accounted for based on the standard appropriate for each asset type. Instruments held in trust for trading purposes are recorded at fair value and unrealized gains and losses are recorded in other income/expenses. Instruments held in trust classified as available-for-sale are recorded at fair value with the corresponding unrealized gains/losses recorded directly in a separate component of equity. Instruments held in trust classified as held to maturity are carried at amortized cost.

e. Tangible Fixed Assets—Tangible fixed assets are stated at cost less accumulated depreciation and gains deferred on the sale and replacement of certain assets. Depreciation of tangible fixed assets, except for lease assets, is mainly computed using the declining-balance method at rates based on the estimated useful lives of the assets. The range of useful lives is principally from 5 to 31 years for buildings and from 4 to 20 years for equipment. Lease assets under finance lease transactions, in which substantial ownership is not deemed to have been transferred, are depreciated using the straight-line method over the lease term. The salvage value is zero or the guaranteed amounts if specified in the lease contracts (see Note 2.p).

f. Intangible Fixed Assets—The amortization of intangible fixed assets is calculated using the straight-line method. Capitalized costs of computer software developed/obtained for internal use are amortized using the straight-line method over the estimated useful lives of five years.

g. Long-Lived Assets—The Companies review their long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset or asset group may not be recoverable. An impairment loss would be recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of the asset or asset group. The impairment loss would be measured as the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of the discounted cash flows ("DCFs") from the continued use and eventual disposition of the asset or the net selling price at disposition.

h. Foreign Currency Items—Assets and liabilities denominated in foreign currencies held by the Bank at year-end are translated into Japanese yen at the current exchange rates in effect at each consolidated balance sheet date. Exchange gains and losses are recognized in the fiscal periods in which they occur.

i. Reserve for Possible Loan Losses—The Bank determines the amount of the reserve for possible loan losses by means of management's judgment and assessment of future losses based on a self-assessment system. This system reflects past experience of credit losses, possible future credit losses, business and economic conditions, the character, quality and performance of the portfolio, and other pertinent indicators.

As part of the Bank's self-assessment system, the quality of all loans is assessed by branches and the credit supervisory division with a subsequent audit by the Bank's asset review and inspection division in accordance with the Bank's policy and rules for self-assessment of asset quality.

The Bank has established a credit rating system under which its debtors are classified into five categories. The credit rating system is used in the self-assessment of asset quality. All loans are classified into one of the following five categories for self-assessment purposes: "normal," "caution," "possible bankruptcy," "virtual bankruptcy," and "legal bankruptcy."

For loans to borrowers classified as legal bankruptcy or virtual bankruptcy, the Bank fully provides the net amount of loans and estimated collectible amounts by collateral or guarantees. Regarding loans to borrowers classified as possible bankruptcy, a specific reserve is provided to the necessary extent for the net amount of loans and estimated collectible amounts by collateral or guarantees.

For large debtors who are likely to become bankrupt and debtors with restructured loans, if the cash flows from collection of the principal and interest can be reasonably estimated, the reserve is provided based on the difference between the relevant cash flows discounted by the initial contractual interest rates and the carrying amounts of the loans (the "DCF method").

The reserve for other possible loan losses is calculated based on the specific actual past loss ratio for normal and caution categories and the fair value of the collateral for collateral-dependent loans and other solvency factors including the value of future cash flows for the other self-assessment categories.

The Bank's subsidiaries determine the reserve for possible loan losses by a similar self-assessment system as that of the Bank.

j. Reserve for Stock-Based Benefits —Reserve for stock-based benefits is provided for the grants of the Bank's shares to directors, etc. in accordance with the stock grant program based on the estimated stock-based benefits liabilities as of the fiscal year end.

k. Reserve for Reimbursement of Deposits—Reserve for reimbursement of deposits which were derecognized as liabilities is provided for the future estimated payments for reimbursement claims on dormant deposit accounts based on the historical reimbursement experience.

l. Reserve for Contingent Losses—Reserve for contingent losses is provided for the future estimated payments of burden money to the Credit Guarantee Corporations based on the historical experience of subrogation.

m. Employees' Retirement and Pension Plans—In calculation of projected benefit obligations, expected benefits are attributed to periods on a benefit formula basis. Treatment of prior service cost and actuarial gains and losses is as follows:

Prior service cost is charged to expenses when incurred.

Unrecognized actuarial gains and losses are amortized by the straight-line method from the following fiscal year after the fiscal year when they were incurred over a definite period (10 years) with the employees' average remaining service period when incurred.

Consolidated subsidiaries apply a shortcut method whereby the amount of the retirement benefits required to be paid if all the employees voluntarily retired at the end of the fiscal year is regarded as projected benefit obligations in determining the liability for employees' retirement benefits and net periodic retirement benefit costs.

n. Asset Retirement Obligations—The asset retirement obligation is recognized as the sum of the DCFs required for the future asset retirement and is recorded in the period in which the obligation is incurred if a reasonable estimate can be made. If a reasonable estimate of the asset retirement obligation cannot be made in the period the asset retirement obligation is incurred, the liability should be recognized when a reasonable estimate of the asset retirement obligation can be made. Upon initial recognition of a liability for an asset retirement obligation, an asset retirement cost is capitalized by increasing the carrying amount of the related fixed asset by the amount of the liability. The asset retirement cost is subsequently allocated to expense through depreciation over the remaining useful life of the asset. Over time, the liability is accreted to its present value each period. Any subsequent revisions to the timing or the amount of the original estimate of undiscounted cash flows are reflected as an increase or a decrease in the carrying amount of the liability and the capitalized amount of the related asset retirement cost.

o. Stock Options—The Bank recognizes compensation expense for employee stock options based on the fair value at the date of grant and over the vesting period as consideration for receiving goods or services. The Bank also accounts for stock options granted to nonemployees based on the fair value of either the stock option or the goods or services received. In the consolidated balance sheet, the stock option is presented as a stock acquisition right as a separate component of equity until exercised.

p. Leases

As a lessee

Finance lease transactions are capitalized to recognize lease assets and lease obligations in the consolidated balance sheet.

As a lessor

All finance leases that are deemed to transfer ownership of the leased property to the lessee are recognized as lease receivables, and all finance leases that are deemed not to transfer ownership of the leased property to the lessee are recognized as investments in leases.

q. Income Taxes—The provision for income taxes is computed based on the pretax income included in the consolidated statement of income. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred taxes are measured by applying currently enacted tax laws to the temporary differences.

r. Derivatives and Hedging Activities—It is the Bank's policy to use derivative financial instruments ("derivatives") primarily for the purpose of reducing market risks associated with its assets and liabilities. The Bank also utilizes derivatives to meet the needs of its clients while entering into derivatives as a part of its trading activities. The Bank enters into interest rate swaps and interest rate swaptions as a means of hedging its interest rate risk on certain loans and investment securities and to meet the needs of its clients. The Bank also enters into currency swaps, foreign exchange forward contracts, and currency options to hedge foreign currency exchange risk associated with its assets and liabilities denominated in foreign currencies and to meet the needs of its clients.

Derivatives are recognized as either assets or liabilities and measured at fair value. Gains or losses on derivative transactions are recognized in the consolidated statement of income. If derivatives qualify for hedge accounting because of high correlation and effectiveness between the hedging instruments and the hedged items, the gains or losses on derivatives are deferred until maturity of the hedged transactions.

The interest rate swaps which qualify for hedge accounting and meet specific matching criteria are not remeasured at market value, but the differential paid or received under the swap agreements is recognized and included in interest expense or income.

s. Per Share Information—Basic net income per share is computed by dividing net income attributable to common stockholders by the weighted-average number of common shares outstanding for the period, retroactively adjusted for stock splits or share consolidation.

Diluted net income per share reflects the potential dilution that could occur if securities were exercised or converted into common stock. Diluted net income per share of common stock assumes full conversion of the outstanding convertible notes and bonds at the beginning of the year (or at the time of issuance) with an applicable adjustment for related interest expense, net of tax, and full exercise of outstanding warrants.

Cash dividends per share presented in the consolidated statement of income are dividends applicable to the respective years including dividends to be paid after the end of the year.

The Company conducted a one-for-five share consolidation of its common stock effected October 1, 2017. All prior year share and per share figures have been restated to reflect the impact of the share consolidation, and to provide data on a basis comparable to the year ended March 31, 2017. Such restatements include calculations regarding the Company's weighted-average number of common shares, basic net income per share, diluted net income per share and cash dividends per share.

3. CASH AND CASH EQUIVALENTS

The reconciliation of cash and cash equivalents at the end of the year and cash and due from banks in the consolidated balance sheet as of March 31, 2018 and 2017, was as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	**2018**
Cash and due from banks	**¥705,563**	¥708,975	**$6,641,217**
Due from banks, excluding due from the Bank of Japan	**(3,627)**	(7,160)	**(34,139)**
Cash and cash equivalents at the end of year	**¥701,935**	¥701,814	**$6,607,068**

4. TRADING ACCOUNT SECURITIES AND INVESTMENT SECURITIES

Trading account securities as of March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	**2018**
National government bonds	**¥ 567**	¥ 594	**$ 5,336**
Local government bonds	**7,407**	6,199	**69,719**
Other securities	**17,000**	13,999	**160,015**
Total	**¥24,975**	¥20,793	**$235,080**

Investment securities as of March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	**2018**
National government bonds	**¥ 992,921**	¥1,233,137	**$ 9,346,018**
Local government bonds	**384,566**	249,904	**3,619,785**
Corporate bonds	**960,182**	983,202	**9,037,857**
Equity securities	**148,295**	139,598	**1,395,849**
Other securities	**635,924**	636,002	**5,985,730**
Total	**¥3,121,890**	¥3,241,844	**$29,385,259**

Securities loaned under securities lending agreements are included in the above national government bonds in the amount of ¥41,236 million ($388,140 thousand) and ¥25,160 million as of March 31, 2018 and 2017, respectively.

Investment in an unconsolidated subsidiary in the amount of ¥25 million ($235 thousand) and ¥25 million and investment in interest in partnership in the amount of ¥926 million ($8,716 thousand) and ¥971 million are included in the above equity securities and other securities as of March 31, 2018 and 2017, respectively.

The carrying amounts and aggregate fair values of securities as of March 31, 2018 and 2017, were as follows:

Securities below include trading account securities and investment securities:

	Millions of Yen			
	2018			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Trading				**¥ 24,975**
Available-for-sale:				
Equity securities*	**¥ 55,931**	**¥90,762**	**¥ 285**	**146,408**
Debt securities	**2,305,308**	**25,644**	**381**	**2,330,571**
Other securities*	**584,564**	**58,055**	**10,377**	**632,241**
Held to maturity	**7,099**	**15**		**7,115**

	Millions of Yen			
	2017			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Trading				¥ 20,793
Available-for-sale:				
Equity securities*	¥ 58,497	¥79,591	¥ 473	137,615
Debt securities	2,420,185	35,975	516	2,455,644
Other securities*	590,223	51,224	9,085	632,362
Held to maturity	10,600	48		10,648

	Thousands of U.S. Dollars			
	2018			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Trading				$ 235,080
Available-for-sale:				
Equity securities*	$ 526,458	$854,310	$ 2,682	1,378,087
Debt securities	21,699,058	241,378	3,586	21,936,850
Other securities*	5,502,296	546,451	97,675	5,951,063
Held to maturity	66,820	141		66,971

* Unlisted equity securities for which the fair value is extremely difficult to determine are not included.

Securities, other than trading account securities, with readily determinable fair value, whose fair value significantly declined compared with the acquisition cost and whose fair value is not considered likely to recover to their acquisition cost, are written down to the respective fair value. The related losses on revaluation are charged to income for the fiscal year.

Impairment losses were recognized for available-for-sale securities in the amount of ¥99 million ($931 thousand), consisting of ¥99 million ($931 thousand) of other securities for the year ended March 31, 2018.

No impairment loss was recognized for securities for the year ended March 31, 2017.

The criteria for determining whether the fair value has "significantly declined" are defined based on the asset classification of the issuer in the internal standards for asset quality self-assessment as follows:

(a) Normal issuer: Fair value declined by 50% or more of the acquisition cost or fair value declined between 30% and 50% and average fair value during the past one month declined by 50% or more (30% or more for issuers who have credit risk more than a certain level).

(b) Caution issuers: Fair value declined by 30% or more of the acquisition cost.

(c) Legally bankrupt, virtually bankrupt, and possibly bankrupt issuers: Fair value is lower than the acquisition cost.

Proceeds from sales of available-for-sale securities for the years ended March 31, 2018 and 2017, were ¥38,786 million ($365,079 thousand) and ¥50,680 million, respectively. Gross realized gains and losses on these sales, computed on a moving average cost basis, were ¥3,030 million ($28,520 thousand) and ¥880 million ($8,283 thousand), respectively, for the year ended March 31, 2018, and ¥2,057 million and ¥155 million, respectively, for the year ended March 31, 2017.

Unrealized gains on available-for-sale securities as of March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Valuation differences:			
Available-for-sale securities	¥163,159	¥156,457	$1,535,758
Available-for-sale money held in trust	17,617	15,020	165,822
Deferred tax liabilities	(53,493)	(50,660)	(503,510)
Unrealized gains on available-for-sale securities	¥127,283	¥120,817	$1,198,070

5. MONEY HELD IN TRUST

The carrying amounts and aggregate fair values of money held in trust as of March 31, 2018 and 2017, were as follows:

	Millions of Yen			
	2018			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Money held in trust classified as:				
Trading				¥131,787
Available-for-sale	¥21,581	¥17,617		39,198
Total	¥21,581	¥17,617		¥170,985

	Millions of Yen			
	2017			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Money held in trust classified as:				
Trading				¥131,451
Available-for-sale	¥21,581	¥15,020		36,601
Total	¥21,581	¥15,020		¥168,053

	Thousands of U.S. Dollars			
	2018			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Money held in trust classified as:				
Trading				$1,240,464
Available-for-sale	$203,134	$165,822		368,957
Total	$203,134	$165,822		$1,609,422

Available-for-sale securities held in trust, whose fair value significantly declined compared with the acquisition cost and whose fair value is not considered likely to recover to their acquisition cost, are written down to the respective fair value.

No impairment loss was recognized for money held in trust for the years ended March 31, 2018 and 2017.

6. LOANS AND BILLS DISCOUNTED

Loans and bills discounted as of March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Bills discounted	¥ 11,149	¥ 9,144	$ 104,941
Loans on bills	143,298	156,710	1,348,814
Loans on deeds	3,927,919	3,768,063	36,972,129
Overdrafts	538,696	509,965	5,070,557
Total	¥4,621,062	¥4,443,883	$43,496,442

Bills discounted are accounted for as financial transactions in accordance with "Treatment of Accounting and Auditing of Application of Accounting Standard for Financial Instruments in the Banking Industry" (the Japanese Institute of Certified Public Accountants (the "JICPA") Industry Audit Committee Report No. 24). The Bank has rights to sell or pledge these bills discounted. The total of the face value of bills discounted was ¥11,149 million ($104,941 thousand) and ¥9,144 million as of March 31, 2018 and 2017, respectively.

Loans and bills discounted as of March 31, 2018 and 2017, included the following loans:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Loans to borrowers in bankruptcy	¥ 3,074	¥ 834	$ 28,934
Past due loans	67,665	77,394	636,907
Past due loans (three months or more)	1,900	772	17,884
Restructured loans	26,235	26,892	246,940
Total	¥98,876	¥105,893	$930,685

Loans to borrowers in bankruptcy represent nonaccrual loans to debtors who are legally bankrupt, as defined in the Enforcement Ordinance for the Corporation Tax Law.

Past due loans are nonaccrual loans which include loans classified as "possible bankruptcy" and "virtual bankruptcy."

Nonaccrual loans are defined as loans for which the Bank has discontinued accruing interest income due to substantial doubt existing about the ultimate collection of principal and/or interest. Such loans are classified either as "possible bankruptcy" or "virtual bankruptcy" under the Bank's self-assessment guidelines.

In addition to past due loans, certain other loans classified as "caution" under the Bank's self-assessment guidelines include past due loans (three months or more) which consist of loans for which the principal and/or interest is three months or more past due, but exclude loans to borrowers in bankruptcy and past due loans.

Restructured loans are loans where the Bank and its subsidiaries relax lending conditions by reducing the original interest rate or by forbearing interest payments or principal repayments to support the borrower's reorganization. Restructured loans exclude loans to borrowers in bankruptcy, past due loans or past due loans (three months or more).

7. FOREIGN EXCHANGES

Foreign exchange assets and liabilities as of March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Assets			
Foreign exchange bills receivable	¥ 24	¥ 14	$ 225
Due from foreign correspondent accounts	5,931	4,733	55,826
Total	¥5,956	¥4,748	$56,061
Liabilities			
Foreign exchange bills sold	¥ 62	¥42	$ 583
Foreign exchange bills payable	50	29	470
Total	¥113	¥72	$1,063

8. TANGIBLE FIXED ASSETS

The accumulated depreciation of tangible fixed assets as of March 31, 2018 and 2017, amounted to ¥79,629 million ($749,519 thousand) and ¥78,088 million, respectively.

As of March 31, 2018 and 2017, deferred gains for tax purposes of ¥7,695 million ($72,430 thousand) and ¥7,695 million, respectively, on tangible fixed assets sold and replaced with similar assets have been deducted from the cost of newly acquired tangible fixed assets.

9. LONG-LIVED ASSETS

The Bank recognized impairment losses of ¥709 million ($6,673 thousand) and ¥505 million on certain operating branches, business premises, branches to be closed, and unused facilities for the years ended March 31, 2018 and 2017, respectively.

The impairment losses were composed of ¥401 million ($3,774 thousand) on buildings, ¥243 million ($2,287 thousand) on land and ¥65 million ($611 thousand) on other fixed assets for the year ended March 31, 2018, and ¥167 million on buildings, ¥266 million on land and ¥70 million on other fixed assets for the year ended March 31, 2017.

For the purpose of testing for impairment, the Bank recognizes each individual branch office as a cash-generating unit for which it continues to manage and monitor identifiable cash flows. Branch offices to be closed and facilities not in operation are individually assessed for impairment. Subsidiaries recognize each company as a cash-generating unit. An impairment loss would be recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of the asset or asset group.

The impairment loss would be measured as the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of the DCFs from the continued use and eventual disposition of the asset or the net selling price at disposition. The DCFs were calculated using discount rates of 5.0% and 2.9% for the years ended March 31, 2018 and 2017, respectively, and the net selling price was determined by quotation from a third-party vendor.

10. CUSTOMERS' LIABILITIES FOR ACCEPTANCES AND GUARANTEES

All contingent liabilities arising from acceptances and guarantees are reflected in "Acceptances and guarantees." "Customers' liabilities for acceptances and guarantees" are shown as assets, representing the Bank's right to receive indemnity from the applicants.

The amount of guarantee obligations for privately placed corporate bonds included in securities as of March 31, 2018 and 2017, was ¥6,165 million ($58,028 thousand) and ¥1,995 million, respectively.

11. ASSETS PLEDGED

Assets pledged as collateral and their relevant liabilities as of March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Assets pledged as collateral:			
Investment securities	¥232,517	¥251,523	$2,188,601
Other assets	144	144	1,355
Relevant liabilities to above assets:			
Deposits	48,676	67,214	458,170
Payables under securities lending transactions	12,886	30,998	121,291
Borrowed money	106,800	106,800	1,005,271

Additionally, investment securities amounting to ¥45,482 million ($428,106 thousand) and ¥46,757 million as of March 31, 2018 and 2017, respectively, and other assets amounting to ¥14,393 million ($135,476 thousand) and ¥14,393 million as of March 31, 2018 and 2017, respectively, are pledged as collateral for transactions, such as exchange settlement transactions or as substitute securities for future transaction initial margin and others.

Other assets include security deposits for financial instruments amounting to ¥2,130 million ($20,048 thousand) and ¥3,564 million as of March 31, 2018 and 2017, respectively, and guarantee deposits for leased tangible fixed assets (lessee side) amounting to ¥93 million ($875 thousand) and ¥93 million as of March 31, 2018 and 2017, respectively.

12. LOAN COMMITMENTS

Contracts of overdraft facilities and loan commitments are contracts with customers to lend up to the prescribed limits in response to customers' applications for a loan, as long as there is no violation of any condition within the contracts. As of March 31, 2018, the unused amount of such contracts totaled ¥1,661,188 million ($15,636,182 thousand), of which amounts with original agreement terms of less than one year were ¥1,569,181 million ($14,770,152 thousand). As of March 31, 2017, the unused amount of such contracts totaled ¥1,720,890 million, of which amounts with original agreement terms of less than one year were ¥1,646,058 million.

Since many of the commitments expire without being drawn upon, the unused amount does not necessarily represent a future cash requirement. Most of these contracts have conditions allowing the Companies to refuse customers' applications for a loan or decrease the contract limits based on proper reasons (e.g., changes in financial situation, deterioration in customers' creditworthiness). At the inception of the contracts, the Companies obtain collateral real estate, securities, etc., if considered to be necessary. Subsequently, the Companies perform a periodic review of the customers' business results based on internal rules and take necessary measures to reconsider conditions in contracts and require additional collateral and guarantees.

13. DEPOSITS

Deposits as of March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Current deposits	¥ 202,200	¥ 244,096	$ 1,903,237
Ordinary deposits	4,663,111	4,461,129	43,892,234
Deposits at notice	14,902	17,029	140,267
Time deposits	2,322,878	2,378,135	21,864,439
Negotiable certificates of deposit	481,570	451,440	4,532,850
Other deposits	261,436	254,029	2,460,805
Total	¥7,946,100	¥7,805,860	$74,793,862

14. BORROWED MONEY

As of March 31, 2018 and 2017, the weighted-average annual interest rates applicable to borrowed money were 0.015% and 0.020%, respectively.

Borrowed money consisted of borrowings from the Bank of Japan and other financial institutions. Annual maturities of borrowed money as of March 31, 2018, were as follows:

Year Ending March 31	Millions of Yen	Thousands of U.S. Dollars
2019	¥110,274	$1,037,970
2020	543	5,111
2021	356	3,350
2022	297	2,795
2023	84	790
2024 and thereafter	148	1,393
Total	¥111,704	$1,051,430

15. LIABILITY FOR EMPLOYEES' RETIREMENT BENEFITS

The Companies have severance payment plans consisting of contributory pension fund plans and noncontributory lump-sum payment plans for employees.

Under most circumstances, employees terminating their employment are entitled to retirement benefits based on the rate of pay at the time of termination, years of service, and certain other factors. Such retirement benefits are made in the form of a lump-sum severance payment from the Companies and annuity payments from trustees. Employees are entitled to larger payments if the termination is involuntary, by retirement at the mandatory retirement age, by death or by voluntary retirement at certain specific ages prior to the mandatory retirement age.

(1) The changes in projected benefit obligations for the years ended March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Balance at beginning of year	¥71,320	¥72,211	$671,310
Service cost	1,723	1,707	16,217
Interest cost	451	457	4,245
Actuarial losses	527	294	4,960
Benefits paid	(3,678)	(3,533)	(34,619)
Prior service cost			
Others	183	184	1,722
Balance at end of year	¥70,527	¥71,320	$663,846

(2) The changes in plan assets for the years ended March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Balance at beginning of year	¥36,091	¥35,933	$339,711
Expected return on plan assets	1,263	1,257	11,888
Actuarial gains (losses)	470	(80)	4,423
Contributions from the employer	773	776	7,275
Benefits paid	(2,004)	(1,980)	(18,862)
Others	183	184	1,722
Balance at end of year	¥36,778	¥36,091	$346,178

(Note) *Plan assets related to the multiemployer welfare pension fund plans adopted by certain consolidated subsidiaries are not included in the above plan assets.*

(3) Reconciliation between the liability recorded in the consolidated balance sheet and the balances of projected benefit obligations and plan assets as of March 31, 2018 and 2017, was as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Funded projected benefit obligations	¥48,307	¥48,635	$454,696
Plan assets	(36,778)	(36,091)	(346,178)
Total	11,529	12,543	108,518
Unfunded projected benefit obligations	22,220	22,685	209,149
Net liability arising from projected benefit obligations	¥33,749	¥35,228	$317,667

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Liability for employees' retirement benefits	¥33,749	¥35,228	$317,667
Asset for employees' retirement benefits			
Net liability arising from projected benefit obligations	¥33,749	¥35,228	$317,667

(4) The components of net periodic retirement benefit costs for the years ended March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Service cost	¥ 1,729	¥ 1,713	$ 16,274
Interest cost	451	457	4,245
Expected return on plan assets	(1,263)	(1,257)	(11,888)
Recognized actuarial losses	1,917	1,798	18,044
Amortization of prior service cost			
Others			
Net periodic retirement benefit costs	¥ 2,834	¥ 2,711	$ 26,675

(Notes) 1. Employees' contribution to corporate pension funds is deducted.
2. Net periodic retirement benefit costs of the consolidated subsidiaries which adopt a shortcut method are included in "Service cost."

(5) Amounts recognized in other comprehensive income (before income tax effect) in respect of defined retirement benefit plans for the years ended March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Prior service cost			
Actuarial gains	¥1,860	¥1,424	$17,507
Others			
Total	¥1,860	¥1,424	$17,507

(6) Amounts recognized in accumulated other comprehensive income (before income tax effect) in respect of defined retirement benefit plans as of March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Unrecognized prior service cost			
Unrecognized actuarial gains	¥8,921	¥10,782	$83,970
Others			
Total	¥8,921	¥10,782	$83,970

(7) Plan assets as of March 31, 2018 and 2017

a. Components of plan assets

Plan assets consisted of the following:

	2018	2017
Debt investments	31%	31%
Equity investments	33	32
Cash and cash equivalents		
Life insurance company accounts (general accounts)	28	28
Call loans, etc.	8	9
Others		
Total	100%	100%

b. Method of determining the long-term expected rate of return on plan assets

The expected rate of return on plan assets is determined considering allocation of plan assets which are expected currently and in the future and the long-term rates of return which are expected currently and in the future from the various components of the plan assets.

(8) Assumptions used for the years ended March 31, 2018 and 2017, were set forth as follows:

	2018	2017
Discount rate	0.6%	0.6%
Long-term expected rate of return on plan assets	3.5	3.5
Expected rate of salary increase	4.5	4.5

16. ASSET RETIREMENT OBLIGATIONS

Asset retirement obligations which were recognized on the consolidated balance sheet for the years ended March 31, 2018 and 2017, were as follows:

a. Overview of asset retirement obligations

Asset retirement obligations are recognized for obligations of restoring leased buildings, such as branch premises, to their original state, based on the real estate lease contracts and asbestos removal costs.

b. Calculation of asset retirement obligations

Asset retirement obligations are calculated based on the estimated available periods of 16 to 31 years depending on the expected useful lives of buildings using discount rates from 0.139% to 2.324%.

c. The changes in asset retirement obligations for the years ended March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Balance at beginning of year	¥675	¥641	$6,353
Increase due to acquisition of tangible assets	29	35	272
Reconciliation associated with passage of time	6	6	56
Decrease due to execution of asset retirement obligations	(32)	(8)	(301)
Other			
Balance at end of year	¥678	¥675	$6,381

17. PERFORMANCE-LINKED STOCK COMPENSATION SYSTEM

The Bank has introduced a performance-linked stock compensation system (the "System") based on the Board Incentive Plan ("BIP") trust from the perspective of enhancing motivation to make contributions to improving the medium- to long-term performance and corporate value by further clarifying the linkage between compensation to directors, etc. and stock value of the Bank.

Under the System, the Bank's shares are acquired using the funds contributed by the Bank as compensation to directors, etc. through the trust and such shares are granted to directors, etc. through the trust according to their ranks and achievement of management plans. Said transactions are related to the System.

The transition to the System was implemented as of August 17, 2017, for those persons who hold the stock compensation-type stock options that were allotted in the past but are not exercised.

The Bank's shares remaining in the trust are recorded as treasury stock under "Equity" and the carrying amount of such treasury stock was ¥1,514 million ($14,250 thousand) and the number of shares was 551 thousand as of March 31, 2018.

18. EQUITY

Japanese banks are subject to the Banking Law and to the Companies Act of Japan (the "Companies Act"). The significant provisions in the Companies Act and the Banking Law that affect financial and accounting matters are summarized below:

a. Dividends

Under the Companies Act, companies can pay dividends at any time during the fiscal year in addition to the year-end dividend upon resolution at the general meeting of stockholders. For companies that meet certain criteria such as (1) having a Board of Directors, (2) having independent auditors, (3) having an Audit & Supervisory Board, and (4) the term of service of the directors being prescribed as one year rather than two years of normal term by its articles of incorporation, the Board of Directors may declare dividends (except for dividends-in-kind) at any time during the fiscal year if the company has prescribed so in its articles of incorporation. The Bank meets all the above criteria. The Companies Act permits companies to distribute dividends-in-kind (noncash assets) to stockholders subject to certain limitations and additional requirements. Semiannual interim dividends may also be paid once a year upon resolution by the Board of Directors if the articles of incorporation of the company so stipulate. The Bank can do so because it stipulates this in its articles of incorporation. The Companies Act provides certain limitations on the amounts available for dividends or the purchase of treasury stock. The limitation is defined as the amount available for distribution to the stockholders, but the amount of net assets after dividends must be maintained at no less than ¥3 million.

b. Increases/Decreases and Transfer of Common Stock, Reserve and Surplus

The Banking Law requires that an amount equal to 20% of dividends must be appropriated as a legal reserve (a component of retained earnings) or as additional paid-in capital (a component of capital surplus) depending on the equity account charged upon the payment of such dividends until the total of the aggregate amount of the legal reserve and additional paid-in capital equals 100% of stated capital.

Under the Companies Act and the Banking Law, the aggregate amount of additional paid-in capital and the legal reserve that exceeds 100% of the stated capital may be made available for dividends by resolution of the stockholders after transferring such excess to retained earnings in accordance with the Companies Act. Under the Companies Act, the total amount of additional paid-in capital and the legal reserve may be reversed without limitation. The Companies Act also provides that stated capital, legal reserve, additional paid-in capital, other capital surplus, and retained earnings can be transferred among the accounts under certain conditions upon resolution of the stockholders.

c. Treasury Stock and Treasury Stock Acquisition Rights

The Companies Act also provides for companies to purchase treasury stock and dispose of such treasury stock by resolution of the Board of Directors. The amount of treasury stock purchased cannot exceed the amount available for distribution to the stockholders which is determined by a specific formula. Under the Companies Act, stock acquisition rights are presented as a separate component of equity. The Companies Act also provides that companies can purchase both treasury stock acquisition rights and treasury stock. Such treasury stock acquisition rights are presented as a separate component of equity or deducted directly from stock acquisition rights.

d. Share Consolidation

On October 1, 2017, the Bank conducted consolidation of shares at a ratio of five shares to one share and every five shares of the Bank's issued and outstanding common stock were exchanged for one issued and outstanding share of common stock of the Bank, taking into consideration the announcement of "Action Plan for Consolidating Trading Units" by the stock exchanges nationwide.

19. STOCK OPTIONS

Expenses related to stock options in the amount of ¥33 million ($310 thousand) and ¥139 million are recorded under general and administrative expenses for the years ended March 31, 2018 and 2017, respectively.

As noted in Note 17, the Bank abolished the stock compensation-type stock options plan on August 17, 2017, and introduced the System.

The stock options outstanding as of March 31, 2018, are as follows:

Nature and extent of stock options:

The Bank conducted consolidation of shares at a ratio of five shares to one share on October 1, 2017.

However, the following tables are presented using the figures before the share consolidation.

	2009 Stock Option	2010 Stock Option	2011 Stock Option	2012 Stock Option	2013 Stock Option	2014 Stock Option	2015 Stock Option	2016 Stock Option

20. OTHER OPERATING INCOME

Other operating income for the years ended March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	**2018**
Gain on sales and redemption of bonds and other securities	**¥ 202**	¥ 92	**$ 1,901**
Lease receipts	**6,808**	6,880	**64,081**
Other	**4,339**	3,082	**40,841**
Total	**¥11,350**	¥10,055	**$106,833**

21. OTHER INCOME

Other income for the years ended March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	**2018**
Gains on sales of stocks and other securities	**¥2,833**	¥1,965	**$26,666**
Gains on sales of tangible fixed assets	**103**	30	**969**
Other	**1,986**	1,905	**18,693**
Total	**¥4,924**	¥3,901	**$46,347**

22. OTHER OPERATING EXPENSES

Other operating expenses for the years ended March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	**2018**
Losses on sales, redemption and devaluation of bonds and other securities	**¥ 8,383**	¥ 4,587	**$ 78,906**
Lease costs	**6,206**	6,250	**58,414**
Other	**4,630**	4,430	**43,580**
Total	**¥19,220**	¥15,268	**$180,911**

23. OTHER EXPENSES

Other expenses for the years ended March 31, 2018 and 2017, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Bad debt losses	¥ 19	¥ 10	$ 178
Losses on dispositions of money held in trust		416	
Losses on sales of loans	331	151	3,115
Losses on impairments and disposals of fixed assets	878	756	8,264
Provision for reserve for reimbursement of deposits	197	229	1,854
Other	439	305	4,132
Total	¥1,866	¥1,870	$17,564

24. INCOME TAXES

The Companies are subject to Japanese national and local income taxes which, in the aggregate, resulted in a normal effective statutory tax rate of approximately 30.8% for the years ended March 31, 2018 and 2017.

The tax effects of significant temporary differences which resulted in deferred tax assets and liabilities as of March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Deferred tax assets:			
Reserve for possible loan losses	¥ 15,346	¥ 18,489	$ 144,446
Liability for employees' retirement benefits	10,283	10,731	96,790
Fixed assets (depreciation)	5,935	6,431	55,864
Losses on devaluation of stocks and other securities	3,310	3,286	31,155
Other	6,460	6,600	60,805
Less valuation allowance	(13,935)	(14,833)	(131,165)
Total	27,400	30,705	257,906
Deferred tax liabilities:			
Unrealized gains on available-for-sale securities	53,493	50,660	503,510
Deferred gain on sales of shares of consolidated subsidiaries	801	805	7,539
Fixed assets (deferred gain on sales and replacements)	329	332	3,096
Other	16	139	150
Total	54,641	51,938	514,316
Net deferred tax liabilities	¥(27,240)	¥(21,233)	$(256,400)

A reconciliation between the normal effective statutory tax rate and the actual effective tax rate reflected in the accompanying consolidated statement of income for the years ended March 31, 2018 and 2017, was as follows:

	2018	2017
Normal effective statutory tax rate	30.8%	30.8%
Expenses not deductible for income tax purposes	0.4	0.4
Nontaxable dividend income	(1.2)	(1.2)
Inhabitants taxes	0.3	0.3
Valuation allowance	(3.6)	(8.5)
Consolidation adjustment on gain on sales of shares of consolidated subsidiaries		4.5
Other—net	0.2	1.2
Actual effective tax rate	26.9%	27.5%

25. OTHER COMPREHENSIVE INCOME

The components of other comprehensive income for the years ended March 31, 2018 and 2017, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Unrealized gains on available-for-sale securities:			
Gain arising during the year	¥ 5,953	¥ 6,227	$ 56,033
Reclassification adjustment to profit or loss	3,345	1,605	31,485
Amount before income tax effect	9,298	7,832	87,518
Income tax effect	(2,833)	(2,250)	(26,666)
Total	¥ 6,465	¥ 5,582	$ 60,852
Deferred gains on derivatives under hedge accounting:			
(Loss) gain arising during the year	¥ (293)	¥ 1,428	$ (2,757)
Reclassification adjustment to profit or loss	833	866	7,840
Amount before income tax effect	539	2,294	5,073
Income tax effect	(164)	(697)	(1,543)
Total	¥ 375	¥ 1,597	$ 3,529
Defined retirement benefit plans:			
Loss arising during the year	¥ (56)	¥ (374)	$ (527)
Reclassification adjustment to profit or loss	1,917	1,798	18,044
Amount before income tax effect	1,860	1,424	17,507
Income tax effect	(565)	(432)	(5,318)
Total	¥ 1,295	¥ 991	$ 12,189
Total other comprehensive income	¥ 8,136	¥ 8,171	$ 76,581

26. LEASES

Finance Leases

Lessor

A subsidiary leases certain equipment and other assets to various customers.

The net investments in leases as of March 31, 2018 and 2017, are summarized as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2018	2017	2018
Gross lease receivables	¥16,581	¥15,845	$156,071
Estimated residual values	1,084	988	10,203
Unearned interest income	(1,704)	(1,728)	(16,039)
Investments in leases	¥15,961	¥15,105	$150,235

Maturities of lease receivables for finance leases as of March 31, 2018, are as follows:

Year Ending March 31	Millions of Yen	Thousands of U.S. Dollars
2019	¥121	$1,138
2020	38	357
2021	6	56
Total	¥165	$1,553

Maturities of investment in leases for finance leases as of March 31, 2018, are as follows:

Year Ending March 31	Millions of Yen	Thousands of U.S. Dollars
2019	¥ 5,413	$ 50,950
2020	4,206	39,589
2021	3,124	29,405
2022	2,090	19,672
2023	1,061	9,986
2024 and thereafter	685	6,447
Total	¥16,581	$156,071

27. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES

(1) Group Policy for Financial Instruments
The Companies provide financial services such as credit card business and leasing operations in addition to banking operations. In the course of these operations, the Companies raise funds principally through deposit taking and invest funds in loans, securities, and others. As such, the Bank holds financial assets and liabilities which are subject to fluctuation in interest rates and conducts comprehensive Asset and Liability Management ("ALM") to avoid unfavorable effects from interest rate fluctuations. Derivatives are also employed by the Bank as part of ALM.
(2) Nature and Extent of Risks Arising from Financial Instruments
Financial assets held by the Companies mainly consist of loans to domestic corporations, local government agencies, and individual customers which are exposed to credit risk that the Companies may suffer from losses resulting from nonperformance of borrowers and interest rate risk that the Companies may suffer from losses resulting from fluctuations in interest rates.

Securities, mainly debt securities, equity securities, and investment trusts are held to maturity and for other purposes and also certain debt securities are held for the purpose of selling to customers. These securities are exposed to credit risk of issuers and market risks of fluctuations in interest rates and market prices. In addition, they are exposed to market liquidity risk that the Companies may suffer from losses resulting from difficulties in executing financial transactions in certain environments such as market turmoil.

Financial liabilities, mainly consisting of liquid deposits or time deposits taken from corporate and individual customers, are exposed to cash flow risk that the Bank may experience a situation where unexpected cash flows are incurred in certain environments where the credit rating of the Bank may be lowered and, accordingly, necessary funding may become difficult.

Foreign currency denominated assets and liabilities are exposed to foreign exchange risk that the Bank may suffer from losses resulting from fluctuations in foreign exchange rates.

Derivatives mainly include interest rate swaps and bond futures, which are used to manage exposure to market risks from changes in interest rates of loans and investment securities, and foreign exchange forward contracts, which are used to hedge foreign exchange risk associated with foreign currency-denominated assets and liabilities. Hedge accounting is applied to certain hedging activities related to loans and investment securities as hedged items.
(3) Risk Management for Financial Instruments
Credit risk management
The Bank has established the "Credit Risk Control Policy" as a basic policy for credit risk management and various rules concerning credit risk management. Based on these policies and rules, the Companies clarify fundamental approaches to secure the soundness of assets and control procedures for identifying, monitoring, and controlling credit risk. Additionally, the Bank utilizes the "Credit Rating System" applied to counterparties granted with credit from the viewpoint of identifying credit risk objectively and enhancing credit risk control.

In addition, as an organization responsible for credit risk management, credit risk control functions and review functions have been established to secure the effectiveness of credit risk management.

The Risk Management Division, as a credit risk control function, is engaged in identifying the level of future possible credit risk and the status of credit concentration in major borrowers through measurement of the level of credit risk and analysis of credit portfolios.

The Credit Supervision Division, as a review control function, is engaged in reviewing lending operations based on strict examination standards, system development for strengthening the daily control of loan receivables, and appropriate maintenance of operational procedures.
Market risk management
a. Market Risk Management System
The Bank has established the "Market Risk Control Policy" as a basic policy for market risk management and various rules concerning market risk management. Based on these policies and rules, the Bank clarifies fundamental approaches for appropriate market risk control operations and control procedures for identifying, monitoring and controlling market risk.

As an organization responsible for market risk management, a market risk control function (middle office) has been established and furthermore, the operating function (front office) and the administration function (back office) have been separated. Additionally, market risk control function staffs are assigned to the operating function to secure the effectiveness of market risk management.

The Risk Management Division, as a market risk control function, measures the level of market risk of the Bank as a whole using Value-at-Risk ("VaR") approach models and other models and regularly monitors the status of compliance with position limits and loss limits established according to the type and characteristics of transactions to control the level of market risk within a certain range.

In addition, an ALM and Income Control Committee was established for the purpose of analyzing flexible investment strategies in order to prevent risks resulting from fluctuations in interest rates and market prices, while forecasting future interest rates, market prices, and trends of fund and business conditions. The committee is also responsible for securing the soundness of management and also improving profitability at the same time based on appropriate asset and liability management through the unification of risk management and earnings control.
b. Quantitative Information about Market Risk
The Bank adopts the variance-covariance method (holding period: 125 business days for strategic equity securities and 60 business days for others; confidence interval: 99.0%; observation period: 250 business days) in computing the VaR with respect to money held in trust, securities, Japanese yen deposits and loans, and Japanese yen money market funds. The volume of market risk (estimated losses) that the Bank is exposed to as of March 31, 2018, amounts to ¥66,894 million ($629,649 thousand) (¥98,039 million in 2017) as a whole. However, the risk under certain abnormal market fluctuations may not be captured since, under the VaR method, the volume of market risk under a definite probability of statistically computed incidence is measured based on historical market fluctuations.

The Bank implements back testing to compare the VaR computed by the model with actual profit and loss in the securities and confirms that the measurement model in use captures the market risk with sufficient precision.
Liquidity risk management
The Bank has established the "Liquidity Risk Control Policy" as a basic policy for liquidity risk management and various rules concerning liquidity risk management. Based on these policies and rules, the Bank clarifies fundamental approaches for stable funding of operations and control procedures for identifying, monitoring and controlling liquidity risk. In addition, the Bank has established the "Contingency Plan for Liquidity" to enable it to make quick and correct responses to unexpected events.

Furthermore, as an organization responsible for liquidity risk management, a liquidity risk control function has been established and a cash management function and a settlement control function have been established to control daily cash management and settlement related to cash and securities.

The Risk Management Division, as a liquidity risk control function, manages the liquidity risk of the Bank as a whole by identifying, monitoring and controlling liquidity risk.

The Treasury Administration and International Division, as a cash management control function and settlement control function, prepares daily or monthly cash flow projections and conducts cash management by identifying possible funds and liquidity of assets and verifying the concentration of settlement of major account funds to a certain date. The Division also controls settlement by identifying the status of settlement through systems such as the BOJ-NET and among financial institutions.
Risk management system of subsidiaries
The subsidiaries have a risk management system similar to that of the Bank.
(4) Supplementary Explanation about Fair Values of Financial Instruments
The fair values of financial instruments include, in addition to the value determined based on market prices, valuations calculated on

a reasonable basis if no market prices are available. Since certain assumptions are used in calculating the value, the outcome of such calculation may vary if different assumptions are used.

(5) Fair Values of Financial Instruments

The carrying amount, the fair value, and the differences thereof as of March 31, 2018 and 2017, are disclosed below. Note that unlisted equity securities for which fair value is extremely difficult to determine are not included in the following table (see Note 2 below) and insignificant accounts in terms of the carrying amount are omitted:

	Millions of Yen		
March 31, 2018	Carrying Amount	Fair Value	Difference
(1) Cash and due from banks	¥ 705,563	¥ 705,563	
(2) Money held in trust	170,985	170,985

(4) Loans and bills discounted	43,496,442		
Reserve for possible loan losses*	(572,835)		
	42,923,597	43,030,252	106,645
Total assets	$80,507,097	$80,613,893	$106,795
(1) Deposits	$74,793,862	$74,797,204	$ 3,341
(2) Borrowed money	1,051,430	1,051,289	(141)
Total liabilities	$75,845,303	$75,848,512	$ 3,200

*General and specific reserves for possible loan losses corresponding to loans and bills discounted are deducted.

Notes:

1. Calculation method for the fair value of financial instruments

Assets

(1) Cash and due from banks

For due from banks, the carrying amount is presented as the fair value since the fair value approximates the carrying amount.

(2) Money held in trust

For securities that are part of trust property in an independently managed monetary trust with the primary purpose to manage securities, the fair values of equity securities and debt securities are determined using the quoted price of the stock exchange, Japan Securities Dealers Association, or the price calculated by financial institutions. The fair value of investment trust is determined using the published standard quotation or the standard quotation offered by the securities investment advisors.

See Note 5, "Money Held in Trust" for notes on "Money held in trust" by categories based on different holding purposes.

(3) Investment securities

The fair values of equity securities and debt securities are determined using the quoted price of the stock exchange, Japan Securities Dealers Association, or the price calculated by financial institutions. The fair value of investment trust is determined using the published standard quotation or the standard quotation offered by the securities investment advisors. With respect to privately placed guaranteed bonds, the fair value is determined using the future cash flows (coupons, redemption of principal, guarantee fees) discounted at an interest rate considering the market interest rates and issuers' credit risk.

(4) Loans and bills discounted

With respect to loans with floating interest rates, the carrying amount is presented as the fair value since the fair value approximates the carrying amount as they reflect the market interest rates over a short period, unless the creditworthiness of the borrower has changed significantly since the loan origination. With respect to loans with fixed interest rates, for each category of loan based on the type of loan, internal ratings, and maturity length, the fair value is determined based on the present value of expected cash flows of aggregated amounts of principal and interest discounted at a rate which is the rate assumed if a new loan was made, or market interest rate, which is adjusted by the standard spread (including overhead ratio) by credit rating. The carrying amount is presented as the fair value if the maturity is within a short time period (less than one year) and the fair value approximates the carrying amount.

For receivables from "legally bankrupt," "virtually bankrupt," and "possibly bankrupt" borrowers, possible loan losses are estimated based on the DCF method or factors such as the expected amounts to be collected from collateral and guarantees. Since the fair value of these items approximates the carrying amount, net of the currently expected loan losses, such carrying amount is presented as the fair value.

For loans for which the repayment due date is not defined because of the characteristics that the loan amount is limited within the pledged assets, the carrying amount is presented as the fair value since the fair value is assumed to approximate the carrying amount considering the expected repayment schedule and terms of the interest rates.

Liabilities

(1) Deposits

Regarding demand deposits, the amount payable as of the balance sheet date (i.e., the carrying amount) is considered to be the fair value. Time deposits and negotiable certificates of deposit are grouped by maturity length, and the fair value is determined using the present value of the aggregate amounts of principal and interest discounted at an interest rate that would be applied to newly accepted deposits. For deposits with maturities within a short time period (less than one year) and whose fair value approximates the carrying amount, the carrying amount is presented as the fair value.

(2) Borrowed money
For each type of borrowed money financed, the fair value is determined based on the present value of the aggregated amounts of principal and interest discounted at a rate which is the rate assumed if a new financing was made. The carrying amount is presented as the fair value if the maturity is within a short time period (less than one year) and the fair value approximates the carrying amount.

2. The financial instruments whose fair value is extremely difficult to determine are as follows. These items are not included in (3) "Available-for-sale securities" under "Assets" in the above table of fair value information of financial instruments.

	Carrying Amount		
	Millions of Yen		Thousands of U.S. Dollars
Category	**2018**	2017	**2018**
Unlisted equity securities*1,*2	**¥1,887**	¥1,983	**$17,761**
Capital subscription in investment business partnerships*3	**3,682**	3,639	**34,657**
Total	**¥5,569**	¥5,622	**$52,419**

*1 *Unlisted equity securities are not treated as instruments whose fair value is required to be disclosed since there is no market price and it is extremely difficult to determine the fair value.*
*2 *Impairment losses in the amount of ¥20 million ($188 thousand) and ¥5 million were recognized for unlisted equity securities for the years ended March 31, 2018 and 2017, respectively.*
*3 *Capital subscription in investment business partnerships, whose assets (i.e., unlisted equity securities) consist of those whose fair values are extremely difficult to determine, is not treated as instruments whose fair value is required to be disclosed.*

3. Maturity analysis for financial assets and securities with contractual maturities as of March 31, 2018

	Millions of Yen					
	Due in 1 Year or Less	Due after 1 Year through 3 Years	Due after 3 Years through 5 Years	Due after 5 Years through 7 Years	Due after 7 Years through 10 Years	Due after 10 Years

** Demand deposits included in deposits are presented under "Due in 1 year or less."*

28. DERIVATIVES

It is the Bank's policy to use derivatives primarily for the purpose of reducing market risks associated with its assets and liabilities. The Bank also utilizes derivatives to meet the needs of its clients while entering into derivatives as a part of its trading activities.

The Bank enters into interest rate swaps and interest rate swaptions as a means of hedging its interest rate risk on certain loans and investment securities while entering into interest rate swaps and interest rate swaptions to meet the needs of its clients.

The Bank also enters into currency swaps, foreign exchange forward contracts, and currency options to hedge foreign exchange risk associated with its assets and liabilities denominated in foreign currencies and to meet the needs of its clients.

Derivatives are subject to market risk and credit risk. Market risk is the exposure created by potential fluctuations of market conditions, including interest or foreign exchange rates. Credit risk is the possibility that a loss may result from a counterparty's failure to perform its obligations under a contract.

The Bank sets limits on credit risk for those derivatives by limiting the counterparties to major financial institutions and securities companies and establishing maximum risk exposures to the counterparties.

The Bank has established a standard of risk management including management approaches for each type of risk. Derivative transactions entered into by the Bank have been made in accordance with internal policies which regulate trading activities and credit risk management including maximum risk exposures and loss-cutting rules. Concerning risk management associated with derivative transactions, the front and back offices of the trading divisions are clearly separated and risk managers are assigned to the trading divisions, while the Risk Management Division synthetically manages the Bank's market risks. In this manner, an internal control system is effectively secured.

The Bank's positions, gain and loss, risk amount, and other conditions are periodically reported to the executive committee.

The Bank has the following derivatives contracts outstanding as of March 31, 2018 and 2017:

Derivative Transactions to Which Hedge Accounting Is Not Applied
With respect to derivatives to which hedge accounting is not applied, contract or notional amount, fair value, and unrealized gains/losses, and the calculation method of fair value are as shown below. Note that the contract or notional amounts of the derivatives which are shown in the table do not represent the amounts of the Bank's exposure to credit or market risk.

30. SEGMENT INFORMATION

Description of Reportable Segments
The Companies are principally engaged in the banking business and also leasing business and other financial services. The reportable segments of the Bank are the segments for which separate financial information is available, and are subject to periodic review by the chief operating decision maker to determine the allocation of management resources and assess performance.

Since the reportable segments of the Companies consist only of the "Banking" segment and since the "Other" segment is immaterial, segment information is omitted.

Related Information for the Years Ended March 31, 2018 and 2017
Information by Service Line

	Millions of Yen				
	2018				
	Loan	Securities Investment	Lease	Other	Total
External customers	¥41,491	¥38,152	¥8,007	¥25,529	¥113,180

	Millions of Yen				
	2017				
	Loan	Securities Investment	Lease	Other	Total
External customers	¥41,308	¥34,091	¥8,214	¥23,077	¥106,692

	Thousands of U.S. Dollars				
	2018				
	Loan	Securities Investment	Lease	Other	Total
External customers	$390,540	$359,111	$75,367	$240,295	$1,065,323

Information about Geographical Area
Information about geographical areas is omitted because the Companies conduct banking and other related activities only in Japan and do not have foreign subsidiaries or foreign branches.
Information about Major Customers
Information about major customers is not presented because there are no customers who account for over 10% of ordinary income.
Information about Asset Impairment Losses
Information about asset impairment losses for the years ended March 31, 2018 and 2017, is omitted because the only reportable segment is "Banking" and "Other" is immaterial.

31. NET INCOME PER SHARE

Basic and diluted net income per share ("EPS") for the years ended March 31, 2018 and 2017, is as follows:

	Millions of Yen	Thousands of Shares	Yen	U.S. Dollars
Year Ended March 31, 2018	Net Income Attributable to Owners of the Parent	Weighted-Average Shares	EPS	
Basic EPS—Net income attributable to common stockholders	¥18,314	74,185	¥246.87	$2.32
Effect of dilutive securities—Stock acquisition rights		125		
Diluted EPS—Net income for computation	¥18,314	74,310	¥246.45	$2.31
Year Ended March 31, 2017				
Basic EPS—Net income attributable to common stockholders	¥16,114	74,694	¥215.73	
Effect of dilutive securities—Stock acquisition rights		343		
Diluted EPS—Net income for computation	¥16,114	75,037	¥214.74	

Above information about the weighted-average number of shares and EPS have been restated as appropriate, to reflect a one-for-five share consolidation effected October 1, 2017.

The Bank's shares held by the directors' compensation BIP trust that are recorded as treasury stock under "Equity" are included in the treasury stock to be deducted when computing the average number of shares during the fiscal year for the calculation of basic net income per share and diluted net income per share.

32. SUBSEQUENT EVENT

Cash Dividends

At the Bank's general meeting of stockholders held on June 28, 2018, the Bank's stockholders approved the following appropriations of retained earnings:

	Millions of Yen	Thousands of U.S. Dollars
Year-end cash dividends, ¥22.50 ($0.211) per share	**¥1,682**	**$15,832**

Note: Above total amount of cash dividends includes dividends for the Bank's shares held by BIP trust in an amount of ¥12 million ($112 thousand).
