Passing on the spirit of Eiichi Shibusawa to the next generation

The Bank was founded in 1878 as The 77th National Bank. Through the tremendous efforts of Eiichi Shibusawa, the core of our bank was created, and we embarked upon the path we have followed to this day. The theory of corporate social responsibility that Shibusawa advocated around the late 19th and early 20th centuries became the focus of renewed attention by the American economist Peter Drucker, and has since become the global mainstream for present-day business activities. The Bank will grow in a sustainable manner, while passing on the spirit of Shibusawa to the next generation in the form of our dedication to business activities that serve the prosperity of the state and local communities.

Eiichi Shibusawa

1840 - 1931; born in Chiaraijima Village, Hanzawa-gun, Musashino Province (present day Fukaya City, Saitama), He exerted all his efforts toward establishing modern capitalism with the power of the private sector.

Eiichi Shibusawa, a businessman who was known as "the father of Japanese capitalism," had a strong interest in the Tohoku region through Munenari Date, who provided him with the opportunity to enter the Ministry of Finance. At the time, there was no bank based in Miyagi Prefecture and partially for this reason, prior to the opening of The 77th National Bank, Shibusawa provided advice on various matters, such as the nature of the banking business and basic management concepts, and guided the establishment of the Bank. Subsequently, he continued to provide investment as a shareholder, and seconded exceptional talent, including Keishi Endo (the second and fourth President) and Seikei Ono (the fifth President) from The Dai-Ichi Bank Limited. Furthermore, Shibusawa provided both mental and practical support to the Bank over many years, including his transfer of The Dai-Ichi Bank Limited's banking business in Miyagi Prefecture to The 77th National Bank and his appointment as Advisor in 1909.

Eiichi Shibusawa, who supported The 77 Bank at the time of our establishment

Eiichi Shibusawa's spirit of "harmony of morality and the economy" lives on today in the line from the Bank Creed, which describes the Bank's management philosophy, that states "the Bank's progress goes hand in hand with prosperity in the local community."

Bank Creed

The Bank's mission is to absorb funds and create credit by exercising its own creativity based on the principle of self-responsibility, in a spirit of maintaining orderly credit conditions and protecting depositors, and thereby contribute to the growth of the national economy.

In light of such public mission, the Bank shall contribute to the local community while seeking a harmonious balance between self-interest and public interest as a regional bank.

Based on the aforementioned principles, the code of conduct to be observed by any and all persons employed by the Bank is set forth

1. Elevate the Spirit of Voluntary Service

Acknowledge that the Bank's progress goes hand in hand with prosperity in the local community, and seek to elevate the spirit of voluntary service at all times.

2. Improve Creditworthiness

Bear in mind that credit is the Bank's lifeblood, and endeavor to improve credit at all times.

3. Nurture the Spirit of Harmony

Recognize that the spirit of harmony is fundamental to the execution of duties, and strive to nurture such spirit at all times.

THE 77 BANK INTEGRATED REPORT | 03 02

Miyaqi Prefecture, which is our main business base, is located in the southeast area of the Tohoku region, and is a key transport hub connecting the Greater Tokyo Area with the Tohoku region. Additionally, the prefectural capital, Sendai, which became the 11th city

designated by government ordinance in Japan in 1989, is home to the branches of many major companies from across Japan, and functions as a core city in the Tohoku region. Miyagi Prefecture generally ranks around 15th among the prefectures in terms of population and key economic indicators such as the Gross Prefectural Product and total retail sales. It generally accounts for a share

Although Miyagi Prefecture experienced significant damage due to the Great East Japan Earthquake, particularly in coastal areas,

it has made steady progress thanks to joint efforts by the public and private sectors. In addition, with the expansion of major

automotive and electronics companies, the manufacturing industry is expected to become a driver for post-recovery economic growth

while economic concentration is advancing owing to active construction investment related to redevelopment projects in Sendai
